WHAT'S YOUR RIGHT FACE MASK FOR THE DEMANDS?

LOW BARRIER - ASTM F2100-19 LEVEL1

For procedures with LOW TO LIGHT amount of fluid,spray,and/or aerosols.

MODERATE BARRIER - ASTM F2100-19 LEVEL2

For procedures with MODERATE TO LOW amount of fluid,spray,and/or aerosols.

HIGH BARRIER - ASTM F2100-19 LEVEL3

For procedures with HIGH TO MODERATE amount of fluid,spray,and/or aerosols.

LOTUSMED® Dual Fit Ear-loop Mask

Proven to provide better protection than standard ear loop masks;The dual fit design to feature dual nose and chin strips for a customized fit; Flexible aluminum strips form a safe,secure seal around your unique face shape; Snug,custom fit minimizes dangerous gaps for superior protection during every procedure and level of aerosol exposure; Available in 3 levels of protection,so you'll always have the right face mask for the demands; ASTM F2100-19 performance levels reflect bacterial/particulate filtration efficiency, fluid resistance, breathability and flammability.

LEVEL 1

For procedures with LOW TO LIGHT amount of fluid,spray,and/or aerosols.
**COMPLIES WITH
ASTM F2100-19 REQUIREMENTS:**

Fluid Resistance80 mm Hg
Bacterial Filtration Efficiency.....BFE≥95%
Particle Filtration Efficiency.....PFE≥95%
Breathability - ΔP<5.0 mm H₂O/cm²
Flame SpreadClass 1

LEVEL 2

For procedures with MODERATE TO LOW amount of fluid,spray and/or aerosols.
**COMPLIES WITH
ASTM F2100-19 REQUIREMENTS:**

Fluid Resistance120 mm Hg
Bacterial Filtration Efficiency.....BFE≥98%
Particle Filtration Efficiency.....PFE≥98%
Breathability - ΔP<6.0 mm H₂O/cm²
Flame SpreadClass 1

LEVEL 3

For procedures with HIGH TO MODERATE amount of fluid,spray, and/or aerosols.
**COMPLIES WITH
ASTM F2100-19 REQUIREMENTS:**

Fluid Resistance160 mm Hg
Bacterial Filtration Efficiency.....BFE≥98%
Particle Filtration Efficiency.....PFE≥98%
Breathability - ΔP<6.0 mm H₂O/cm²

食品用使い捨て頭掛け式不織布マスク(2層)

Disposable Food Grade Head-Loop Non-woven Face Mask (2PLY)

- 衛生管理等に最適! 長時間着けていても快適な使い捨てマスクです。
 - 通気性に優れており蒸れにくく、息苦しくなりにくい仕様なので長時間の作業におすすめです。
 - 食品加工、品質検査、製品管理、衛生管理等の現場での咳やくしゃみ等によるつばの飛散防止。
 - 異物混入対策に最適なマスクです。
 - ノーズピース入りなので、鼻部にフィットします。
 - 衛生的な使い捨てタイプです。
 - 2層の不織布タイプですので、ほこり等を侵入を防ぐ防護性に優れております。
 - 通気性が良く息苦しくなりにくいので長時間使用できます。
- ※ こちらの商品はオーバーヘッド(頭掛け)タイプとなっております。
- ※ 通常のマスクとは異なり、粉塵や花粉、ウイルス等を防ぐ事はできません。

Kinesiology Tape & Form Underwrap Professional Technical Information

Product Definition

Kinesiology Tape is an elastic, breathable, and hypoallergenic medical adhesive tape featuring a unique wave-pattern adhesive design that mimics human skin elasticity (typical stretch ratio: 130%–180%). Its core function is to interact with the skin through mechanical stimulation, regulating musculoskeletal, fascial, lymphatic, and nervous system functions. Widely applied in sports medicine, rehabilitation therapy, and daily health management.

Core Technical Features

Material Science

Elastic substrate: 97% cotton + 3% spandex blend (or high-performance polyester fiber) with biomechanical compatibility to human soft tissues.

Medical-grade acrylic adhesive (latex-free): Hypoallergenic, ≥85% breathability (ASTM D737 standard), maintains adhesion for 72 hours.

Wave-pattern adhesive: Increases breathable surface area by 40%, reducing sweat accumulation and detachment risks.

Biomechanical Design

Dynamic lifting effect: Tape recoil creates 0.5–2mm space between skin and fascia, reducing intertissue pressure by 20–30%.

Neurosensory modulation: Inhibits pain signals via mechanical stimulation (application of Gate Control Theory).

Clinical Adaptability

Customizable I/Y/X shapes for muscles, ligaments, and tendons.

Waterproof variants maintain 48-hour adhesion for aquatic sports (swimming/surfing).

Mechanism of Action

Targeted Effect	Physiological Response	Clinical Manifestation
Mechanical decompression	Increased subcutaneous space	Edema/pain relief
Microcirculation improvement	Enhanced blood/lymph flow	Accelerated tissue repair
Proprioceptive input	Mechanoreceptor activation	Movement control enhancement
Postural correction	Continuous tension feedback	Improved body alignment

Application Scenarios

Sports Medicine

Acute injuries: Lymphatic drainage for ankle sprains ("fan technique").

Injury prevention: Quadriceps fatigue management in marathon runners.

Rehabilitation Therapy

Post-surgical rehab: Knee stability training post-ACL reconstruction.

Chronic pain: Glenohumeral mobility improvement in frozen shoulder.

Daily Health

Office workers: Cervical anteversion correction ("cross-taping").

Pregnancy: Relief of compensatory lumbar strain.

Form Underwrap Professional Technical Information

Product Definition

Form Underwrap is a lightweight, non-adhesive padding material designed to provide a protective base layer beneath athletic tapes, rigid strapping, or compression bandages. It is widely used in sports medicine, physiotherapy, and orthopedic care to enhance comfort, prevent skin irritation, and improve the effectiveness of external support systems.

Core Technical Features

Material & Structure:

Made from soft polyurethane foam or synthetic fiber blends, it offers cushioning while maintaining breathability.

Non-adhesive surface ensures easy removal without damaging skin or body hair.

Functional Advantages:

Skin Protection: Reduces friction and pressure points caused by rigid tapes or braces, minimizing blisters, chafing, or adhesive allergies.

Moisture Management: Wicks sweat away from the skin, maintaining a dry microenvironment during intense activity.

Conformability: Stretches and molds to body contours (e.g., joints, muscles) for seamless coverage.

Enhanced Adhesion: Creates a smooth surface for tapes/straps to adhere firmly, improving stability and durability.

Applications:

Sports Injury Prevention: Wrapped around ankles, wrists, or knees before taping to protect during high-impact activities (e.g., basketball, soccer).

Post-Injury Rehabilitation: Used under casts or splints to cushion sensitive areas and absorb sweat.

Daily Support: Ideal for athletes or individuals requiring joint stabilization without restricting movement.

Technical Specifications:

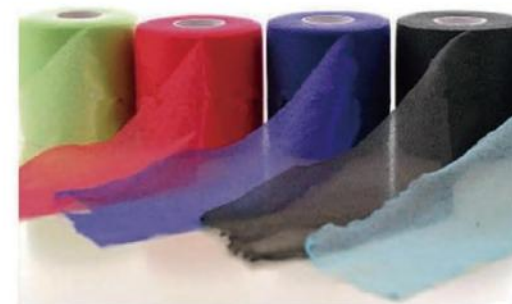

Thickness: Typically 1 – 3 mm (varies by brand/model).

Elasticity: 150 – 200% stretch capacity for optimal fit.

Hypoallergenic: Latex-free and dermatologist-tested for sensitive skin.

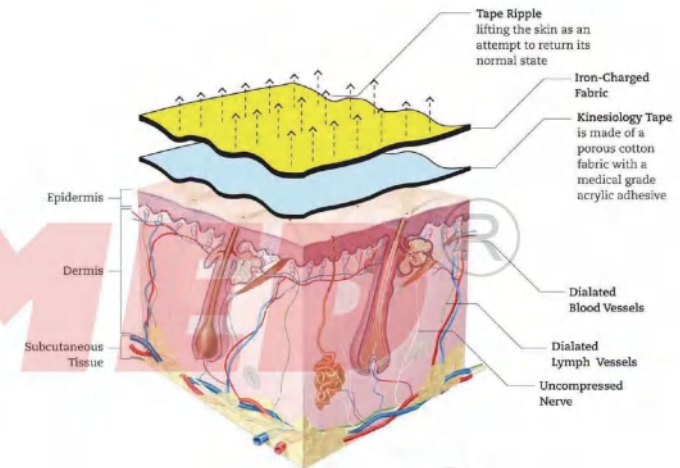

Color Options: Neutral tones (white, beige) or sport-oriented colors (black, blue).

Colors Available: Tan(TN), White (WH), Red(RD), Blue(BL), Green(GR), Yellow(YL), N.Pink(NP), N.Green(NG), Purple(PU), Orange(OR), Light Blue(LB), Black(BK), Teal(TE), Smiley(SM).

Kinesiology Tape Professional Technical Information

Kinesiology Tape delivers measurable outcomes by enhancing athletic performance, increasing range of motion, and simultaneously reducing pain and recovery time from sports injuries. When elastic kinesiology tape is applied under tension to an inflamed area, the skin undergoes a gentle lifting effect as the tape recoils toward its natural state. This results in visible micro-convolutions (slight puckering) on the taped surface. The created interstitial space between the epidermis and underlying inflamed tissues alleviates compressive forces on vascular, lymphatic, and neural structures within the affected region. Enhanced perfusion facilitates oxygen and nutrient delivery to damaged tissues, promoting tissue repair. Concurrently, optimized lymphatic drainage diminishes edema, thereby decompressing nociceptors and yielding prompt analgesia. Application adheres to muscle fiber orientation, with tape placement either from origin to insertion or inversely. Strategic tension is applied during installation—whether facilitating weakened muscle function or inhibiting hypertonic musculature. For biomechanical correction, rigid tape configurations may restrict ligamentous mobility, while clustered elastic tape segments can mitigate hematoma and inflammation.

Laundry Along the Ganges

The laundering process on the Ganges banks involves lumberjack-like repetitive motions, imposing chronic mechanical stress on shoulder and back musculature. Kinesiology taping interventions effectively offload myofascial strain, optimizing workflow efficiency while reducing physical exertion.

Poultice Dressing & Veterinary Non-woven Cohesive Bandage Technical Information

Square Shaped Poultice Dressing

Material: Cotton
Size: 20cmx40cm
Package:
1 piece/bag, 100 bags/ctn

The Poultice Dressing is a highly absorbent, multi layered dressing impregnated with the natural poulticing agent Tragacanth and Boric Acid a mild, natural antiseptic. Tragacanth becomes active when wet, drawing any dirt and debris from the wound, while helping to maintain a moist, clean environment to support the natural healing of skin and tissue. The antiseptic quality of Boric Acid keeps the area clean and free from unwanted germs.

APPLICATIONS

It can be used as a hot poultice, cold poultice or dry dressing and is suitable for the treatment of infected wounds, open wounds, foot punctures, corns, bruised soles, thrush, seedy toe, abscesses, laminitis, sandcracks and thorns. Suitable for horses and dogs, the dressing contains Boric Acid BP, an active ingredient which promotes effective healing, plus tragacanth, a natural poulticing agent that draws infection out of the wound.

Hoof Shaped Poultice Dressing

Material: Cotton
Size: 14.5cmx13.5cm
Package:
3 pieces/bag, 100 bags/ctn

The Hoof Poultice has been designed to comfortably fit your horse's hoof, reducing preparation time and enabling ease of application. May be applied in three different ways depending on the wound to be dressed, either apply as a hot, cold or dry hoof poultice and hold in place with other Wrap.
