All the material used for the production of disposable medical devices are certified for medical purpose.

Our products exceed all the requirements of EN 13795 and bear the CE label according to EC directive 94/92EEC medical devices.

Material Legend:

The flexibility of our production structure enables us to develop products to meet specific demands of our customers. A variety of products and materials are used to adjust to different medical procedures, we offer a range of best cost-efficient solutions and surgical sets compositions.

SMS Non-woven (Spunbond-Meltblown-Spunbond)

3ply polypropylene composite fabric, comfortable to wear, with a strong barrier to fluids and particles.
With following additional options: Alcohol and fluids repellent/Anti-static

SMMMS Non-woven (Spunbond-Meltblown-Meltblown-Meltblown-Spunbond)

5ply polypropylene material composition, with 3 layers of Meltblown fabric, even more secure.
With following additional options: Alcohol and fluids repellent/Anti-static

Composite Non-woven

2 or more layers of materials are compounded together for different functions such as higher strength, better fluid absorption, barrier properties, etc.

SURGICAL CLOTHING

Preventing direct microorganisms contact in the operating field is the fundamental function of the surgical gown: to decrease the transmission of skin flora from health care staff and to protect the staff against the blood-borne pathogens of the patient. Comparing to the traditional reusable gowns, disposable surgical gowns perform a stronger barrier between the medical staff and the patient as presenting a more solid, reliable and reproducible bacterial impermeability. Full Guard offers a wide range of disposable surgical gowns made by high quality non-woven fabrics to provide a more thorough protection as well as enhance the comfortableness and performance for the surgical team.

Protection and Comfort

Not only light and soft, we're always looking for more: more breathable and comfortable is our ultimate goal.

- Customizable

A wide range of surgical clothing of different level of protection that can be used in surgeries of various departments.

- Performance

Perfectly block fine dust and liquid.

No flocculent particles.

Collar with velcro makes it convenient to put on and fix.

- Quality

Sterilized label on package to easily confirm if the product is well under non-bacteria condition.

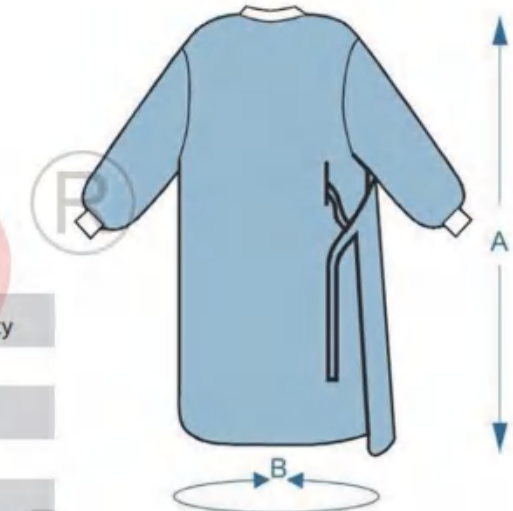

Reinforced technique, durable protection.

The production and quality inspection are in accordance with the European Standards and American Standard AAMI safety guidelines.

SURGICAL DRAPES AND PACKS

FullGuard provides a wide selection of both standard surgical drapes and customized drapes to meet our customers' needs.

Surgical drapes isolate the surgical area from non-sterile areas of the patient's body and the operating table, reducing the risk of germ transfer in surgeries.

Custom-surgical packs contain everything needed for the surgery, providing the medical staff and the patient with better safety solutions and greater efficiency in the surgery.
